

## 1. Types of Licenses

<https://docs.microsoft.com/en-us/power-platform/admin/power-automate-licensing/types>

For the purposes of our developed template, we will address only 2 types of the available licenses Microsoft provides for Power Automate Flows.

- Per User (Administrator-Dell AIM Integration User Only)
- Per Flow

### Per User (Admin only)

This plan provides a user with rights to run an unlimited number of flows (within service limits) with the full capabilities of Power Automate, including [standard connectors](#), [premium connectors](#), [business process flows](#), [custom connectors](#), [on-premises gateways](#) based on their unique needs for a monthly fixed cost for each user.

- Per Microsoft: “[When] an automated/scheduled flow uses a premium connector, only the owner needs to have a premium license. This is the context the Dell AIM Power Automate Flow provided template uses.” No additional user licensing is required.

<https://docs.microsoft.com/en-us/power-platform/admin/power-automate-licensing/faqs#who-needs-to-purchase-a-premium-license>

### Per Flow

With this plan, organizations can implement flows with reserved capacity that serve a team, a department, or an entire organization without having to license each user separately. This plan starts with a fixed monthly cost for five active flows. There is a monthly fee for each additional active flow (beyond the five flows that are included in the base fee). In Per Flow licensing, no user licensing is necessary.

## 2. Pricing

<https://powerautomate.microsoft.com/en-us/pricing/>

### Per User (Admin Only)

\$15/Month

### Per Flow

\$100/Flow/Month - 5 flow minimum

## 3. Platform Request Limits

<https://docs.microsoft.com/en-us/power-platform/admin/power-automate-licensing/types#power-platform-requests>

### Per User

- 40K total requests/day - sliding 24 hour window (100K during Transition period)

### Per Flow

- 250K total requests/day - sliding 24 hour window (500K during Transition period)

**All**

- 100K total requests/5 minutes  
\*The five minute limit is 100,000 requests and it is independent of a user's license.

Transition Period - All customers are in a transition period. That means that enforcement isn't strict and limits are higher. The transition period ends after Power Platform admin center reports are generally available. Organizations will have six months to analyze their usage and purchase licenses that are appropriate before strict enforcement on license limits begins.

**4. Performance**

<https://docs.microsoft.com/en-us/power-automate/limits-and-config>

Performance profile	Plans
Low	- Free - Microsoft 365 plans - All license trials
High	- Power Automate per flow plan
